

# BCP 0 D

Water treatment and filtration equipment

## BCP 0 D

### BCP 0 D - Automatic bleed control

Compact package for precise control of the total dissolved solids level of the recirculating water in evaporative cooling equipment.

- **Consistent good water quality:** dependable control of the cycles of concentration, regardless of the variances in thermal load profile
- **Maximum reliability:** motorized bleed that eliminates failures

## BCP 0 D - Automatic bleed control

Compact package for precise control of the total dissolved solids in the recirculating water in evaporative cooling equipment.

- **Consistent good water quality:** dependable control of the total dissolved solids concentration, regardless of the variances in thermal load per unit of water.
- **Maximum reliability:** motorized bleed that eliminates failure of manual bleed.
