

COOLING TOWER CERTIFICATION

...level competitive playground. WHAT DOES IT MEAN?

➔ TO THE INDUSTRY

- ✓ Faster product development
- ✓ Products with higher efficiency
- ✓ CO₂ footprint improvement

➔ TO YOU

- ✓ Thermal performance assured
- ✓ No field testing required
- ✓ Value for money

BAC participates in the ECC programme for cooling towers. Check ongoing validity of certificate: www.eurovent-certification.com

**INSIST ON
Eurovent certified cooling towers**

EUROVENT cooling tower certification programme

- ✓ Easy access for ALL European manufacturers
- ✓ Lab/field testing possible in Europe
- ✓ Eurovent Certification Company assures European presence

Note:

- Certification programmes for other evaporative cooling products in Europe are under development.
- The Eurovent cooling tower certification programme is developed in cooperation with the Cooling Technology Institute (CTI).

Specify Eurovent certified cooling towers

The thermal performance shall be Eurovent certified in accordance with CTI Certification standard STD-201. Equipment without Eurovent certification will be subject to a field or factory acceptance thermal performance test executed by a qualified independent third party testing agency in accordance with a recognized test standard.
