

# Original spare parts

For lowest process operating costs

1. Fan and drive components
2. Water distribution components
3. Fill
4. Coil
5. Eliminators
6. Louvers
7. Controls (not shown)

To select your correct replacement part, contact your local representative.

## 1. Fans and drive

- Axial fans
- Centrifugal fans
- Fan shafts
- Bearings
- Motors
- Sheaves
- Belts
- Gear boxes
- Baltiguard system

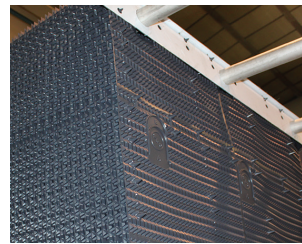

## 2. Water distribution

- Nozzles
- Spray branches
- Spray pumps
- Strainers
- Make-up
- Pump piping
- Clean out port
- Sump sweeper piping

## 3. Fill

- BACount
- BACross
- Versacross fill
- Versapak
- FRP fill
- High temperature fill
- Cross fill blocks

## 4. Coils

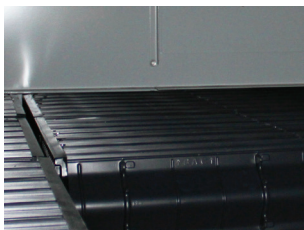

- Standard coil
- Coil and casing
- Extended surface coils
- Plume abatement coils
- Dry finned coils
- Ice storage coils

## 5. Eliminators

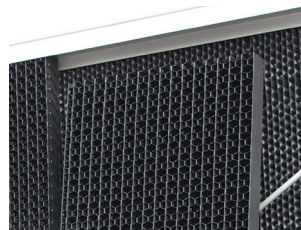

- Blade type
- Cellular type
- Metal eliminators
- Cassette type
- Fill integrated type

Our eliminators are Eurovent certified.

## 6. Louvers

- Combined inlet shields
- Framed combined inlet shields
- Louvers
- Adiabatic pre-cooler pads

## 7. Controls

- Basin heater package
- Electric water level control package
- Low-high level switch
- Adiabatic controls
- Vibration cut out switch
- Hybrid controls

# Aftermarket services

## Spare parts

Baltimore Aircoil Company's original spare parts are not just components. They guarantee year-round reliable operation of your cooling equipment by offering you several benefits.

### Benefits

- Original performance to minimize system operating cost
- Minimum downtime, maximum service life
- Operational safety
- Improved operation and maintenance via the latest technology
- Long-term availability and traceability
- Quick delivery

Our genuine spare parts offer you these benefits because:

- They meet our specifications — optimized by more than **80 years of cooling product experience**.
- Every part undergoes a **testing process** under different conditions.
- Our parts meet unrivalled **safety** and **quality** requirements.
- Our parts are state of the art and **fit perfectly**.

## Services

Baltimore Aircoil Company and our local representatives offer a complete range of products and services for **optimal efficiency and safe operation** of your cooling towers and evaporative condensers.

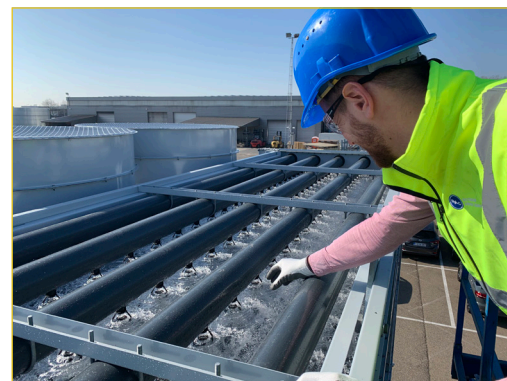

We are your one-stop partner for cooling towers, condensers and all cooling system aftermarket services.

### Benefits

- Optimally simplified operation, administration and communication
- Improved assurance of asset protection, safety and compliance with best practice
- Optimized water treatment and filtration equipment
- Performance-oriented service for all mechanical and operational needs
- Reduced overall operational costs

### Preventive maintenance

Various maintenance programs include a range of services to keep your cooling towers and condensers running all year round. Boost savings and service life and maximize cooling system reliability!

### Refurbishment and upgrading

Refurbishment and upgrades boost equipment efficiency, satisfy new regulations and standards and enhance maintainability, allowing optimal performance and safer operation.

### Water treatment and filtration equipment

Wide-ranging automatic water treatment and filtration packages to limit corrosion, scaling, fouling and microbiological growth. Water treatment assemblies maintain recirculating water quality, limit consumption and are compatible with any chemical treatment program.

### Cleaning and disinfection

A full cleaning and disinfection service in line with local legislation and codes of practice.

### Service technicians

We have a team of fully trained and skilled technicians, all of whom work on our models. They ensure minimum downtime and cooling system disruption.
